

## Making Learning Affordable – an iOS/Android App for Easy Purchase of Used Books

### The Challenge

The client wanted to build a mobile app for the users to sell and purchase used books at cheap prices. They wanted to have an application, which can scan ISBN numbers of an old book and provide users the best price to buy that book.

### The Solution

Trantor created iOS and Android applications for the customer. The scope of app included:

- Maintaining 1million+ records of books.
- Implementing the Bar code reader functionality for real-time capturing of the ISBN code of the books
- Maintaining history of records of sales and purchases made by every user
- Providing different panel views for admin, and different types of users – teachers, students, libraries etc.

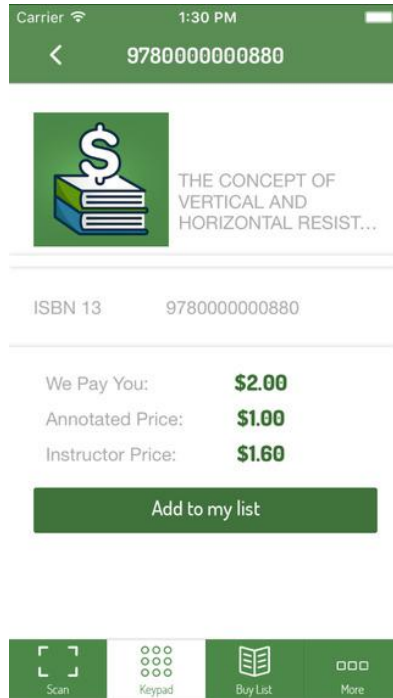

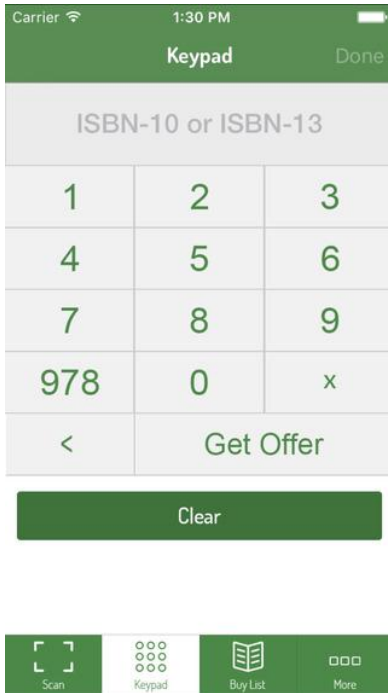

### The Client

The client is a wholesale textbook company that purchases textbooks from students, faculty members, campus staff and campus bookstores and sells it to students across various campuses at lower cost.

---

**“Trantor understood our idea and translated it into a beautiful product, without involving us in technology nitty-gritty. Kudos to the team for this rare-skill.”**

CTO

## The Benefits

- 550+ Downloads for the app from iTunes in a short span
- The Mobile App helped the client to expand his business to 35 states in the US
- Client was able to reach 100+ universities to help students buy cheap books
- The client got cost effective development with increased business visibility

---

## ABOUT TRANTOR

Trantor delivers innovative technology solutions to enable our clients achieve their business objectives at reduced cost. With expertise in both Cloud-based and traditional applications, we understand all aspects and challenges of software development from product and feature definition, through core product development and QA, deployment, and ongoing maintenance. Our deep experience in fintech and ecommerce, captive centers, and custom software development is unparalleled.
